Title	Software Engineer	[languages]	JavaScript, TypeScript, Go, Java, Python, SQL, HTML/CSS
Role	Full-Stack Developer	[frontend]	React 19, Next.js, Tailwind CSS, Zustand, Redux, Vite
Core	Go · Java · Node.js	[backend]	Node.js/Express, Spring Boot, Gin (Go), Flask
Uptime	~1 year professional	[data_infra]	PostgreSQL, MySQL, MongoDB, Redis, Docker, Azure, Cloudflare, Git
Frontend	React 19 + Next.js		
Backend	Spring Boot · Gin · Express		
Deploy	Docker · Azure · Cloudflare		

> head -n 3 about.md

> Full-stack developer with about a year of hands-on experience building web applications, APIs, and production platforms. Comfortable across the modern JavaScript/TypeScript ecosystem (React, Next.js, Node.js) and backend stacks like Go and Java/Spring Boot. Has shipped cloud-ready architecture on Azure and Cloudflare, containerized with Docker, from first commit to production.

[2025.07 – 2026.01] Trainee Full-Stack Developer @ Sanmark Solutions

- > Developed and maintained responsive frontend components with React and TypeScript, improving user engagement and application performance.
- > Engineered backend APIs with Node.js and Express, integrated with MySQL for secure data management.
- > Collaborated cross-functionally to debug and optimize existing codebases, enhancing overall system architecture.

[2023.12 – 2024.06] Intern Full-Stack Developer @ Hotels Hippo

- > Built and tested interactive frontend components with React, JavaScript, and Tailwind CSS.
- > Improved codebase maintainability and successfully launched new features.
- > Delivered responsive, user-friendly interfaces while consistently meeting tight project deadlines.
